## PROFILE

A junior software developer with extensive experience in front and back-end technologies. Looking to apply my problem-solving skills and a meticulous attention to detail within a commercial software development environment. Have developed strong interpersonal and time-management skills, through over 6 years experience in customer facing roles. Informed by my background in studying political science, passionate about the potential digital skills have for transformationally impacting the world around us.

## TECHNICAL QUALIFICATIONS

### CODE CLAN

Code Clan is Scotland's first digital bootcamp. The skills it teaches over a 16 week period enabling its students to transition into the technology sector.

### PROJECTS

FLASK CRICKET WORLD CUP APP

[github.com/O-Marsters-1997/Flask\\_cricket\\_app](https://github.com/O-Marsters-1997/Flask_cricket_app)

*Python, Flask, Jinja, PostgreSQL, HTML, SCSS*

- Created an application for keeping track of the 2021 Cricket World Cup.
- Manipulated relevant data using Python and connected that data to the front-end using Flask and Jinja.
- Managed relational databases using PostgreSQL.
